## Philly suburb doc named to national task force

### William Warning of West Chester to Patient-Centered Primary Care Collaborative

(HARRISBURG, PA.) [The Pennsylvania Academy of Family Physicians \(PAFP\)](http://www.pafp.com) is proud to announce that member William Warning, MD, of West Chester, has been chosen to co-direct the Task Force on Education and Training of the [Patient-Centered Primary Care Collaborative \(PCPCC\)](http://www.pcpcc.org).

The PCPCC is a nationally renowned health organization that seeks to transform health care in America by emphasizing primary care and the physician-directed “[patient-centered medical home](#)” care model. Partners of the PCPCC include 333,000 primary care organizations (including the American Academy of Family Physicians); Fortune 500 companies like IBM, Microsoft and FedEx; payers such as Geisinger and Humana; and interest groups and unions including AFL-CIO, SEIU, and the AARP. With the PCPCC, Warning will focus on equipping the health professional workforce with the tools and skills it needs to provide patient-centered, integrated care to a growing patient pool.

Warning, a member of the PAFP since 1991, is the program director of the Crozer-Keystone Health System’s Family Medicine Residency Program in Springfield, Delaware County. He completed his medical education at Jefferson Medical College in Philadelphia and his family medicine residency at Lancaster General Hospital in Lancaster. In addition to being a fellow of the American Academy of Family Physicians, Warning is the lead faculty for the PAFP’s Residency Program Collaborative, which teaches patient-centered medical home principles in Pennsylvania residency programs and has been awarded an intensive evaluation by the Centers for Disease Control and Prevention (CDC) based on its promising work in preventing heart attack and stroke.

The Pennsylvania Academy of Family Physicians and its Foundation supports its members (including nearly 80 percent of Pennsylvania family physicians) through advocacy and education to ensure a patient-centered medical home for every Pennsylvanian. The Academy and its Foundation are the leading influential resource among family physicians and physicians in training in Pennsylvania; the primary voice on health care issues with state legislative and administrative branches of government, media and professional health organizations; and the leader on health care issues in the community.
